[Click here to visit the web page for this course](#)

- Latest regulatory guidance (USFDA, EMA/EU, PIC/S) & ICH Q8, Q9 (R1), Q10, Q11, Q12 and the 3 Stage approach to validation
- Effective process development & understanding
 - Identifying Critical Quality Attributes, establishing Critical Process Parameters and their relationships, including Design Space
 - Quality by Design (QbD)
- Tools for Process Validation
 - Quality Risk Management
 - Use of Statistics
- Process Validation approaches for:
 - Small & large molecule API/Drug Substance manufacture
 - Pharmaceutical Drug Product manufacture, including fill/finish
 - Pharmaceutical Packaging
- Maintaining the Validated State
 - Continued/Ongoing Process Verification
 - Statistical process control
 - Quality Systems, e.g. effective change control

Course Summary - Pharmaceutical Process Validation - 31 October & 1 November 2023 - Hotel Scandic Copenhagen

This pharmaceutical validation training course provides delegates with a detailed appreciation of the full life cycle related to pharmaceutical and biopharmaceutical process validation. The course covers process validation for pharmaceutical and biopharmaceutical Active Pharmaceutical Ingredients (API's), a variety of pharmaceutical product formulations and primary/secondary packing.

The course includes areas such as: the concept of Operating Space, Design Space and Knowledge Space and how this relates to real life; typical process design considerations; the importance of correctly identifying critical quality attributes and the control parameters that influence / affect them (using risk assessment tools to help); quality by design and design of experiments; equipment / process control philosophy and maintaining process development traceability from laboratory through to pilot / scale-up studies and eventual production scale.

A typical approach to the validation of secondary packing operations is included, together with an overview of key regulations, guidelines and standards, including the FDA process validation guide, the EU process validation guidelines and ICH Q8, Q9(R1), Q10 and Q11. Validation documentation requirements, sampling requirements (acceptable quality levels), management of deviations and Continued Process Verification, including critical GMP supporting systems, are also covered by this course. The course will be presented by individuals who have extensive and recent 'hands-on' knowledge and experience of the subject.

Delegates will be provided with a 3-slide per page printed binder upon arrival on Day 1 and PDF versions of the slides will be sent out by email to each delegate after the course. Day-time meals and refreshments, together with a course dinner, held on the evening of Day 1 (Tuesday 31 Oct 2023), are included in the overall package.

Presenters

Mike James, Compliance & Validation Services Limited: Mike has over 25 years' experience in the pharmaceutical industry, working in a variety of compliance and validation roles. His experience includes preparation and delivery of national/client-based validation training courses, hands-on validation work, validation project management and regulatory compliance consultancy. Previously, Mike spent four years as the Site Validation Manager for GlaxoSmithKline (GSK) at Speke, where he was responsible for all site validation activities, including the development and maintenance of the Site Validation Programme. Before moving to the pharmaceutical industry he spent 15 years as an industry chemist. x

Bruce Davis has over 25 years experience with the pharmaceutical industry having previously worked for AstraZeneca. He is an engineer by profession & has put in place many development and manufacturing facilities, in EU, the Americas and Asia. He is strong supporter of the benefits brought from science and risk based approaches, supporting Quality by Design and the latest 3 Stage Process Validation. He started his own business in 2008, running training and consultancy both externally and in-house for pharmaceutical companies. He likes to make his courses engaging and relevant and is passionate about the importance of linking science and technology to practical manufacturing and engineering, to support patient needs.

Peter Whyment: Peter has worked in the Biopharmaceutical Manufacturing Industry for over 30 years and has a wealth of knowledge/expertise in the area of process validation. During his time in industry he has worked in Quality Control Laboratories, Analytical Development and as a senior scientist in a Manufacturing, Science & Technology function, Peter has overseen the successful technical transfer or commercial manufacturing of several biotechnology processes, including Insulin and growth hormone products.

Who Should Attend

Individuals to benefit from attending this course include anyone involved directly or indirectly in process validation activities. The course is ideally suited to people who are new to process validation roles, or those who wish to expand their knowledge base, or those whose job roles require them to have a greater understanding of process validation. This will involve personnel from production, quality assurance, validation, technical support and engineering departments.

On leaving the course delegates will: have a broad and detailed understanding of the activities involved in pharmaceutical process validation; be able to apply and share their new knowledge; improve their individual effectiveness; and look back on a valuable experience.

Venue Hotel

Hotel Scandic Copenhagen: Modern, centrally located hotel with great views of the Lakes and Copenhagen's skyline. The hotel facilities include a gym, bar and restaurant.

Address: Vester Søgade 6, 1601 Copenhagen V, Denmark

Tel: +45 33 14 35 35

Email: copenhagen@scandichotels.com

Course fees are £1,900.00 (GBP) per delegate. (See Page 4 for further details on fees/bookings)

Day 1 (Tuesday 31 October 2023)	Day 2 (Wednesday 1 November 2023)
Start: 09:00 (CET)	Start: 09:00 (CET)
Introduction <i>[Mike James]</i> <ul style="list-style-type: none"> Fundamental reasons for undertaking process validation and for getting it right Examples of what can happen if you get things wrong 	Statistics For Process Validation <i>[Bruce Davis]:</i> <ul style="list-style-type: none"> Tools used and application throughout the lifecycle of process validation.
A science and risk based, lifecycle approach to Product Development and Manufacture – Validation Stage 1 <i>[Bruce Davis]</i> <ul style="list-style-type: none"> The link between Process Validation and a lifecycle approach to Product Development and Manufacture Introduction to Quality by Design (QbD) (ICH Q8 and Q11) QbD terminology: <ul style="list-style-type: none"> Quality Target Product Profile (QTPP) Critical Quality Attribute (CQA) Critical Process Parameter (CPP) Critical Material Attributes (CMA) Design Space Control Strategy Continual Improvement Examples/workshops ICH Q12 Application to legacy products 	Process Performance Qualifications, US & The different EU approaches to Process Validation – Validation Stage 2.2 <i>[Bruce Davis]:</i> <ul style="list-style-type: none"> Relationship to development phase (process design objectives) Establishing the number of batches required <ul style="list-style-type: none"> Risk and statistical basis Bracketing, Matrix, and Family Approaches Establishing acceptance criteria Testing / sampling matrix – covering CQAs Traditional Process Validation Continuous Process Verification Hybrid approach
Systems Supporting a Science and Risk based approach <i>[Bruce Davis]</i> <ul style="list-style-type: none"> Quality Risk Management (ICH Q9 R1) <ul style="list-style-type: none"> Risk tools, using real life examples Pharmaceutical Quality System (ICH Q10) – Applicable to the product lifecycle <ul style="list-style-type: none"> Process & Product Quality Monitoring Corrective & Preventative Action (CAPA) Change Management Management Review 	Continued/ Ongoing Process Verification – Validation Stage 3 <i>[Bruce Davis]</i> <ul style="list-style-type: none"> CPV plan Product Quality and Process Performance Monitoring System Statistical Process Control tools Link to APQR
	API Process Validation, Small Molecules <i>[Mike James]</i> <ul style="list-style-type: none"> Regulatory perspective Determining impurity profiles and identifying risks Simplifying manufacturing routes Identifying / defining critical process parameters Typical PV approaches to multistage synthesis of APIs/Workshop
Tools Supporting QbD <i>[Bruce Davis]</i> <ul style="list-style-type: none"> Process Analytical Technology (PAT) Design of Experiments (DoE) Process Analysers Multivariate data analysis Process Modelling Process Control 	Process Validation - Biopharmaceutical API Manufacturing <i>[Industry Expert]</i> <ul style="list-style-type: none"> Real-life case studies <ul style="list-style-type: none"> Process definition Critical process control parameters Sequence of events involved in a complex project Process validation testing strategy Resolving issues
	Packaging Validation <i>[Mike James]</i> <ul style="list-style-type: none"> Annex 15 – What is its impact? Key considerations relating to packing process robustness What are the GMP risks relating to poor operations/materials Key packaging attributes and related control parameter Equipment qualification focus versus process validation focus Typical validation approaches, including grouping of products in relation to pack/line set-up.

How to book on this course:

- The simplest and quickest way is to book online. Please visit/return to our web-site, find the course that you are interested in and follow the simple instructions (link included below), or
- Print out this page, complete the form below by hand and return by fax, email or post.

Fax: +44 (0)1625 800833

Tel: +44 (0)1625 500833 or +44 (0)1270 760882

E-mail: info@candvs.com

Alternative Booking Form (*“** indicates required fields)

Booking Terms & Conditions

*Booking Contact Name:		
*Booking Contact E-mail Address:		
*Booking Contact Telephone Number:		
*Company Name & Address:		
*Billing Address <i>(Only complete if different to Company Address)</i>		
*Delegate Information:	Delegate Name(s):	Delegate Email Address:
Company VAT Number (or Sales Tax Number) – *EU Countries Only		
*Method of payment, e.g. card or invoice payment	NOTE: For card payments by telephone, please ensure you have entered your telephone number above and we will contact you. Alternatively, call +44 (0)1625 500833 to make your payment.	
Payment Reference (if available)	NOTE: For invoice payments we will need a valid purchase order number to fully confirm the booking.	
* Total Fees Due £1,900 [GBP] per Delegate	NOTE: If your finance centre or delegates are based in the United Kingdom (UK), or delegates are booking as private individuals (non-company), the course fee will be subject to an additional 20% UK VAT charge (£2,280 per delegate including UK VAT). For EU Countries where finance centres and delegates are NOT based in the UK, VAT will be ZERO RATED under the reverse charge rule. For non-EU countries and non-EU delegates, VAT is not applicable.	

Booking Confirmation

Bookings will only be confirmed upon payment by credit card, or in the case of invoice payment (bank transfer), upon receipt of a valid purchase reference number.

Cancellation by Delegates

Cancellation refunds will depend on how long before the course start date the cancellation is received. The following refund structure will apply:

- More than 28 days will incur a cancellation fee of £200 GBP per registration and qualify for a refund of the remaining course fees
- Between 28 days and 14 days notice will qualify for a 75% refund
- Between 14 days and 7 days notice will qualify for a 50% refund
- No refund will be given for cancellations received with less than 7 days notice
- Substitutions for registered delegates will be accepted without notice, but for administration purposes, we kindly ask you to let us know as soon as you can.

Cancellation by CVS

CVS does not issue refunds for delegates unless:

- We have cancelled a course
- We have changed the time, or date of a course

If we do cancel or reschedule an event, CVS is not responsible for any costs incurred by delegates. Only the course fee will be refunded.

Please be assured that we are not in the habit of cancelling events. We only cancel events in exceptional circumstances.

Speaker/Presenter Changes

We reserve the right to change a speaker without notice.

Course Fee & VAT Liability

For the majority of participating countries, VAT will be ZERO rated. However, for companies whose finance centre is based in the United Kingdom (location where invoices are managed) the indicated course fee will be subject to an additional 20% UK VAT charge. Also, anyone booking as a private individual (not through a company) will be charged UK VAT. CVS has to charge this by law.

All participating EU based companies (based on the site location), must provide CVS with a valid VAT/Sales Tax reference number, in order for the booking to be completed. CVS is required by law to collect this information.

Liability

CVS reserve the right to cancel or reschedule any course and/or change presenters.

Please be advised that CVS is not responsible for any airfare and/or hotel penalties or other travel charges that delegates may incur.

CVS does not take responsibility for ensuring the well being of delegates during their travel to and from the venue or at any time during their stay at the residential location. We will however do everything within our power to help ensure delegates remain safe and well during the course and related activities.

Where government intervention, military activities, natural phenomenon, strikes or any other circumstances make it impossible or inadvisable to run the course at the designated time and place, the delegate shall waive any claim for damages or compensation except the amount paid for registration after the deduction of actual expenses incurred by CVS in connection with the course that the delegate has registered for and there shall be no future liability on the part of either party.
